LAMITEC

Galvanized steel stamp panel gauge 22

Exact depth in the stamp and measures, which allow perfection in the design, in relation to the optimum rigidity and resistance of the material.

Compatibility between all models **without the need for welding**, by the function of the Lamiclick patented system.

Available in Zintro Steel.

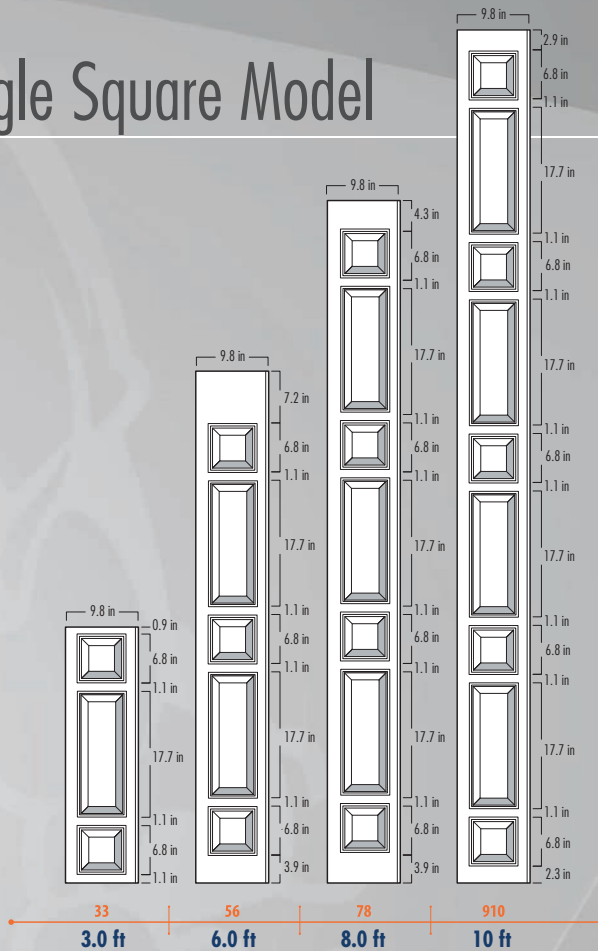

*Zintro Steel with a G60 galvanized coating, can be painted without primer.

Ideal material to fabricate doors, doorways, cabinet and gates.

Perfect material in residential and commercial construction projects.

ASSEMBLE YOUR PANEL IN 3 SIMPLE STEPS

LAMICLICK technology is a system of assembly between our panels in an extremely easy and clean way, **without the need of welding.**

Place the parts on
a firm surface

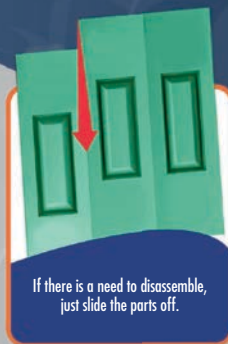

Insert the Edge of the single bend into the triple bend, forming a small angle.

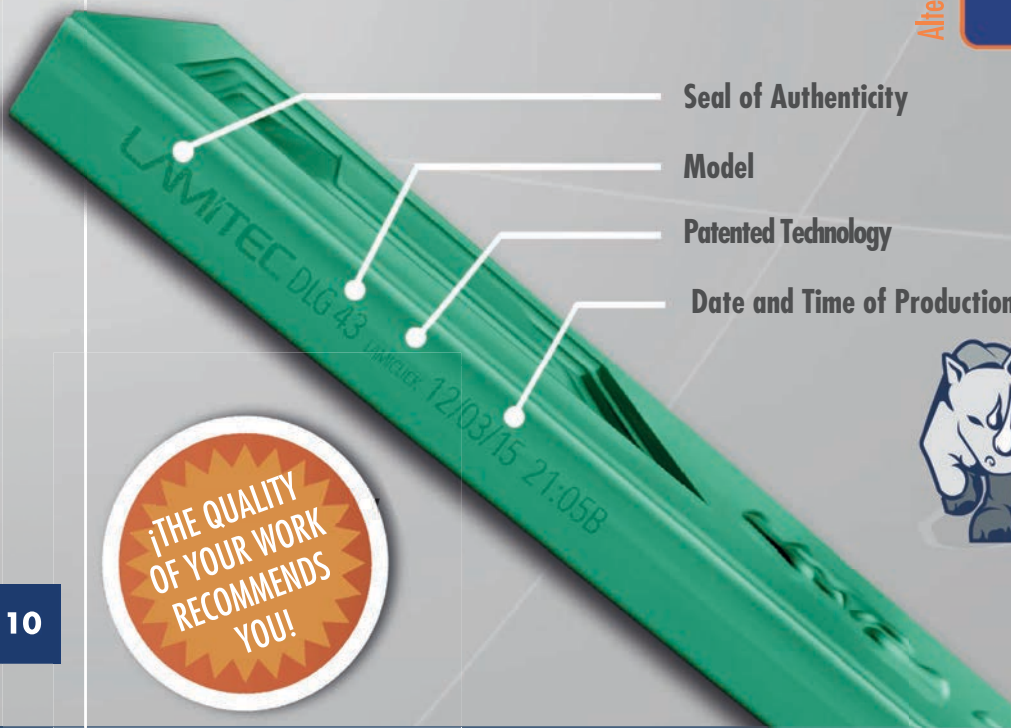

Press carefully along the assembly and this is where the Lamiclick technology comes into action, replacing the welding.

Alternative

If there is a need to disassemble, just slide the parts off.

AND MORE...

STEELBOND

Structural acrylic adhesive for all types of metals.

Each adhesive contains 45 ml

Features & Benefits

It works in just 10 minutes!

Maximum strength in 24 hours

Less health risk

No runoff

Works as cold welding

You can bond high surface energy materials

(ABS, polyurethane, polycarbonate, PVC, acrylic, nylon, wood, MDF, metals)

Illustrative photos.

iEasy to apply!

Adhesive strength per square inch

| Surface | lb/in ² |
|-------------------------|--------------------|
| Aluminum | 3399.9 |
| Stainless steel | 3199.9 |
| Polyvinyl chloride | 1800 |
| Acrylonitrile Butadiene | 1299.9 |
| Styrene | 1099.9 |
| Acrylic | 849.9 |
| Polycarbonate | 550 |
| Polystyrene | 799.9 |

1
Clean the bonding area with isopropyl alcohol.

2
Press the trigger to make 5.9in lines at the panels joint.

3
Previously place the assembled panels and press for 10 minutes.

It works in only 10 minutes!
